

Testing Report - Case Details - SC_002

Report Timestamp: 06-18-2025, 02:31:29

Testing URL: <https://bigappmarket-dev.appiancloud.com/suite?signin=native>

Testing Environment: QA

Current Network Speed: Test Test

Test Introduction

To verify data ingestion from xlsx file by verifying data ingested in appian case pages.

Test Methodology

The test methodology used in this performance test focusing on page load time to measure how quickly a web page loads at different section under various conditions, including different network speeds and user traffic loads. By analyzing the page load times across different sections of the application, the testing aims to pinpoint areas of optimization, such as server response time, content delivery, and front-end performance, ensuring that the page loads efficiently and provides a seamless user experience.

Test Summary

* Building value for 2002 - Present matched in both XLSX file and Appian page: 24123

Result: Passed

Note:

1) Python version: 3.11

2) Jenkins version: 2.514
